

YOUR GP PRACTICE IS OPEN....

Due to the COVID-19 pandemic, practices are experiencing severe pressure however, they are open and have been open throughout the pandemic even when they have had to restrict physical access to the building to protect you and their staff.

If you need a face to face appointment with your GP, this is still possible. General Practice is here to help and understand your health needs. Your GP will use the best clinical judgment to ensure that your health needs as well as your safety, are a top priority.
